

ZW-6 series

HITACHI

Reliable solutions

ZW220

WHEEL LOADER

Model code : ZW220-6

Engine output : 149 kW / 200 hp (ISO14396 net)

Operating weight : 17 950 – 18 360 kg

Bucket ISO heaped : 2.4 – 3.3 m³

ZW220-6. NO COMPROMISE

The latest Hitachi wheel loaders have been developed specifically to meet the demands of the evolving European construction industry. The ZW220-6 offers exceptional levels of performance without compromising on efficiency, thanks to low levels of fuel consumption.

The new model underlines Hitachi's reputation for high-quality engineering and durable products. The epitome of reliability, the ZW220-6 is also extremely versatile for a variety of industry solutions.

6. FIRST-RATE RELIABILITY

8. DESTINED FOR DURABILITY

10. EXCEPTIONAL VERSATILITY

12. DEDICATED TO QUALITY

14. DRIVEN BY TECHNOLOGY

DEMAND PERFECTION

The ZW220-6 has been designed and built using market-leading technology in Japan. Developed to perfection, with an emphasis on the environment, operator comfort and safety, it responds to customer demands for exceptional productivity at the lowest possible cost of ownership.

Powerful performance

Quick power switch increases engine output when required.

Industry-leading safety

360° visibility from the cab.

Easy to operate

Multifunctional monitor shows information at a glance.

Smooth operation

Ride control minimises machine pitching.

Superior comfort

Spacious cab with several storage compartments.

**Enhanced design**

Excellent rear view thanks to the curved engine hood.

**Quieter performance**

New materials in the cab absorb sound to reduce noise levels.

**Enhanced fuel efficiency**

New Stage IV engine without DPF.

**Low running costs**

7% fuel saving in load and carry operations (6% in V-shaped loading).

**User-friendly**

Effortless control with the optional Joystick Steering System.

**Convenient access**

Easy-to-open wide engine covers.

“The reliability of Hitachi wheel loaders helps us to maintain our reasonable running costs”

Even Gausen, Managing Director, Farbu & Gausen

FIRST-RATE RELIABILITY

Like all Hitachi wheel loaders, the ZW220-6 is renowned for its reliability to achieve an optimum performance with minimal downtime. It will operate at the highest levels of efficiency on a wide range of job sites, and is easy to maintain thanks to its accessible components.

Minimal downtime

The ZW220-6 has one battery compartment instead of two, which provides easier access for maintenance and battery replacement. This results in minimal downtime and a high level of availability.

Quick access

The engine covers open fully for convenient access. This helps to ensure routine maintenance is completed quickly to ensure a reliable performance.

Improved fuel efficiency

The ZW220-6 demonstrates greater fuel efficiency than the previous model during V-shape loading, and load and carry

operations. This results in considerable savings for running costs.

Easy maintenance

For safer and easier maintenance, the battery disconnect switch is now included as standard. This helps to avoid electrical accidents and retain battery energy during long-term storage.

Reduced cost

The new Stage IV-compliant engine does not require a diesel particulate filter, which further reduces fuel consumption and maintenance costs.

Easy access to the engine compartment.

The battery is easy to maintain.

New engine reduces fuel consumption.

Increased lift arm torsion improves productivity.

Optional anti-clogging radiators enhance durability.

i The final checking and inspection procedure for each Hitachi wheel loader is typical of Hitachi's dedication to manufacturing products of unfailing quality in response to customer needs.

DESTINED FOR DURABILITY

Hitachi's global reputation for producing robust construction machinery continues with its new medium wheel loaders. Designed and engineered to operate reliably across a wide range of demanding job sites, the ZW220-6 is guaranteed to deliver a durable performance.

Added protection

The optional belly guard protects the machine powertrain and driveshaft from potential damage caused by materials on the ground.

Strengthened components

The lift arm torsion of the ZW220-6 has been increased to meet customer demand. This also enhances productivity during lifting operations.

Durable materials

High-quality radiators improve resistance to corrosion and enhance the overall durability of the ZW220-6 wheel loader.

Maximum uptime

Optional anti-clogging radiators (WPFR) are designed with square-shaped instead of triangular-shaped fins to prevent clogging. This enhances the radiator's durability.

The optional belly guard provides added protection.

“Hitachi machines are ideal for the type of work we do in such an isolated location”

Peter Madsen, Project Director, LNSG

EXCEPTIONAL VERSATILITY

The smooth and efficient operation of Hitachi wheel loaders makes them an ideal choice for a wide range of applications. Several features contribute to the overall versatility of the ZW220-6, and bring additional benefits of increased productivity, fuel efficiency and safety.

Efficient flexibility

The quick power switch increases engine output when more power is instantly required, or when driving uphill.

unloading so that the wheel loader quickly returns to digging, which helps to increase productivity.

Enhanced rear visibility

The muffler and air intake have been repositioned and aligned to improve the rear-view visibility from the cab, enhancing safety on a variety of job sites.

Convenient storage

The convenient utility space at the rear of the ZW220-6 has been designed to provide sufficient storage for a variety of tools.

High productivity

The simultaneous movement of the bucket and lift arm ensures a smooth digging operation. The bucket is prioritised after

Effective control

To ensure a smooth drive on all kinds of terrain, the ride control feature prevents unnecessary pitching via the movement of lift arm cylinders.

Rear visibility has been enhanced by design modifications.

The ride control feature ensures a smooth performance.

The quick power switch increases power when required.

Urea is injected into the exhaust gas to reduce emissions.

Easy access for maintenance from ground level.

i Hitachi conducts user tests in Japan to assess the features of its wheel loaders. Results have revealed an unrivalled level of control.

DEDICATED TO QUALITY

Each new Hitachi wheel loader is rigorously tested to ensure it meets the highest possible standards of performance, reliability, comfort and safety. Built using high-quality components, the ZW220-6 is one of the quietest wheel loaders and offers the best all-round visibility in its class.

Reduced emissions

Hitachi has developed a selective catalytic reduction (SCR) system that injects urea into exhaust gas to reduce nitrogen oxide from emissions. This cutting-edge technology not only helps the environment, but also complies with EU Stage IV emission regulations.

The SCR system reduces emissions and noise levels.

Easy access

The engine air filter has been relocated to the rear of the engine compartment, providing easier access at ground level for maintenance. The urea tank is also positioned for convenience.

Excellent visibility

The 360° panoramic view of the spacious cab creates a comfortable working environment, and helps to increase safety and productivity. The rear-view camera also contributes to excellent all-round visibility and safety on the job site.

Improved comfort

Sound insulation has been improved in the cab to significantly reduce noise levels and provide a quieter working environment for operators. The low-noise engine also results in a quieter performance, which makes it suitable for working in urban areas.

“ We need a wheel loader that is completely reliable and available 24/7, and the Hitachi does everything that is required of it ”

Árpád Barabás, CEO, Barabás

DRIVEN BY TECHNOLOGY

The advanced technology incorporated within the design of the ZW220-6 highlights Hitachi's constant focus on enhancing customer satisfaction. Every component is designed and built to meet the requirements of owners and operators, and the ever-changing needs of the industry.

Reduced maintenance

A new Stage IV-compliant engine contains a high-volume cooled exhaust gas recirculation (EGR) system, a common rail-type fuel injection system and a diesel oxidation catalyst (DOC). This helps to reduce fuel costs and maintenance requirements.

Smaller environmental impact

The optional auto shutdown feature helps to prevent fuel wastage, as well as reduce noise levels, exhaust emissions and CO₂

levels of the ZW220-6 medium wheel loader.

Optimum performance

Hitachi ZW-6 wheel loaders are fitted with a multifunctional LCD colour monitor that shows useful information at a glance, such as fuel and urea levels, oil temperature and power modes. It ensures an optimum performance and easy maintenance. It also includes the display for the easy-to-use rear-view camera, which enhances visibility for a safe operation.

Remote monitoring

Global e-Service allows ZW220-6 owners to monitor their Hitachi machines remotely via Owner's Site (24/7 online access) and ConSite (an automatic monthly report). These help to maximise efficiency, minimise downtime and improve overall performance.

User-friendly operation

The optional Joystick Steering System enables operators to reach high levels of productivity with effortless steering, and incorporates a number of useful functions.

The LCD monitor shows the machine's status and settings.

The optional Joystick Steering System provides exceptional control.

Urea levels can be checked from the cab.

“ We are very happy with the quality and low cost of ownership of the Hitachi wheel loader ”

Phil Meuser-Schaede, owner, Trasswerke Meurin

REDUCING THE TOTAL COST OF OWNERSHIP

Hitachi has created the Support Chain after-sales programme to ensure optimum efficiency, as well as minimal downtime, reduced running costs and high resale values.

Global e-Service

Hitachi has developed two remote monitoring systems as part of its Global e-Service online application. Owner's Site and ConSite are an integral part of the wheel loader, which sends operational data daily via GPRS or satellite to www.globaleservice.com. This allows immediate access to the Owner's Site, and the vital information that is required for support on job sites.

Comparing the ratio of operating and non-operating hours helps to enhance efficiency. Effective management of maintenance programmes helps to maximise availability.

Running costs can also be managed by analysing the fuel consumption. The location and movements of each machine are clearly displayed for essential planning.

An automatic service report – ConSite – sends a monthly email summarising the information from Global e-Service for each wheel loader. This includes: daily working hours and fuel consumption data; statistics on the operating mode ratio, plus a comparison for fuel consumption/efficiency, and CO² emissions.

Technical support

Each Hitachi service technician receives full technical training from HCME in Amsterdam. These sessions provide access to the same technical knowledge available within the Hitachi quality assurance departments and design centres. Technicians combine this global expertise with the local language and culture of the customer to provide the highest level of after-sales support.

Extended warranty and service contracts

Every new Hitachi ZW-6 wheel loader is covered by a full manufacturer's warranty.

Global e-Service

Technical support

Hitachi Parts

For extra protection – due to severe working conditions or to minimise equipment repair costs – Hitachi dealers offer a unique extended warranty called HELP (Hitachi Extended Life Program) and comprehensive service contracts. These can help to optimise the performance of each machine, reduce downtime and ensure higher resale values.

Parts

Hitachi offers a wide range and a high availability of parts dispatched from the

53,000 m² HCME European Parts Depot in The Netherlands.

- Hitachi Genuine Parts: allow machines to work for longer, with lower running and maintenance costs.
- Hitachi Select Parts and 2Genuine Parts: especially for older machines, they cost less, are of proven quality and come with the manufacturer's warranty.
- Performance Parts: to cope with highly demanding conditions, they have been engineered for greater durability, better performance or longer life.
- Remanufactured components: offering an economically viable solution, they are the best option when preventative replacements are required.

Whatever the choice, the renowned quality of Hitachi construction machinery is assured.

“ We develop
construction machinery
that contributes to the
creation of affluent and
comfortable
societies ”

Yuichi Tsujimoto, HCM President

BUILDING A BETTER FUTURE

Established in 1910, Hitachi, Ltd. was built upon a founding philosophy of making a positive contribution to society through technology. This is still the inspiration behind the Hitachi group's reliable solutions that answer today's challenges and help to create a better world.

Hitachi, Ltd. is now one of the world's largest corporations, with a vast range of innovative products and services. These have been created to challenge convention, improve social infrastructure and contribute to a sustainable society.

Hitachi Construction Machinery Co., Ltd. (HCM) was founded in 1970 as a subsidiary of Hitachi, Ltd. and has become one of the world's largest construction equipment suppliers. A pioneer in producing hydraulic excavators, HCM also manufactures wheel loaders, rigid dump trucks, crawler cranes and special application machines at state-of-the-art facilities across the globe.

Incorporating advanced technology, Hitachi construction machinery has a reputation for the highest quality standards. Suitable for a wide range of industries, it is always hard at

work around the world – helping to create infrastructure for a safe and comfortable way of living, developing natural resources and supporting disaster relief efforts.

Hitachi ZW wheel loaders are renowned for being reliable, durable and versatile – capable of delivering the highest levels of productivity under the most challenging of conditions. They are designed to provide owners with a reduced total cost of ownership, and operators with the ultimate level of comfort and safety.

EX ultra-large excavators

SPECIFICATIONS

ENGINE

Model	CUMMINS QSB6.7
Type	4-cycle water-cooled, direct injection
Aspiration	Turbocharger and intercooled
Aftertreatment	DOC and SCR system
No. of cylinders	6
Maximum power	
ISO 14396	149 kW (200 hp) at 2 200 min ⁻¹ (rpm)
ISO 9249, net	145 kW (194 hp) at 2 200 min ⁻¹ (rpm)
Maximum torque, gross ...	929 Nm at 1 500 min ⁻¹ (rpm)
Bore and stroke	107 mm X 124 mm
Piston displacement	6.69 L
Batteries	2 x 12 V
Air cleaner	Two element dry type with restriction indicator
Emission	Complies with EU stage IV and US EPA Tier 4 Final

POWER TRAIN

Transmission	Torque converter, countershaft type powershift with computer-controlled automatic shift and manual shift features included.
Torque converter	Three element, single stage, single phase
Main clutch	Wet hydraulic, multi-disc type
Cooling method	Forced circulation type
Travel speed* Forward / Reverse	
1st	6.2 / 6.5 km/h (6.5 / 6.8 km/h)
2nd	10.6 / 11.1 km/h (11.1 / 11.7 km/h)
3rd	16.0 / 24.9 km/h (16.8 / 26.2 km/h)
4th	23.8 km/h (25.0 km/h)
5th	36.0 km/h (36.0 km/h)
*With 23.5R25 (L3) tires	
() : Data at Power Mode	

AXLE AND FINAL DRIVE

Drive system	Four-wheel drive system
Front & rear axle	Semi-floating
Front	Fixed to the front frame
Rear	Trunnion support
Reduction and differential gear	Two stage reduction with torque proportioning differential
Oscillation angle	Total 24° (+12°, -12°)
Final drives	Heavy-duty planetary, mounted inboard

TIRES

Tire size	23.5R25 (L3)
Optional	Refer to standard & optional equipment list

BRAKES

Service brakes	Inboard mounted fully hydraulic 4 wheel wet disc brake. Front & rear independent brake circuit
Parking brakes	Spring applied, hydraulically released, dry disc type with external output shaft

STEERING SYSTEM

Type	Articulated frame steering
Steering angle	Each direction 37° ; total 74°
Cylinders	Double-acting piston type
No. x Bore x Stroke	2 x 70 mm x 442 mm

HYDRAULIC SYSTEM

Arm and bucket are controlled by multifunction lever	
Arm controls	Four position valve ; Raise, hold, lower, float
Bucket controls with automatic bucket return-to-dig control	Three position valve ; Roll back, hold, dump
Main pump (Serve as steering pump)	Variable Displacement Axial Plunger Pump
Maximum flow	275 L/min at 2 200 min ⁻¹ (rpm)
Maximum pressure ...	27.4 MPa
Fan pump	Fixed Displacement Gear Pump
Maximum flow	65.8 L/min at 2 200 min ⁻¹ (rpm)
Maximum pressure ...	19.0 MPa
Hydraulic cylinders	
Type	Double acting type
No. x Bore x Stroke ...	Arm : 2 x 130 mm x 880 mm Bucket : 1 x 165 mm x 510 mm
Filters	Full-flow 15 micron return filter in reservoir
Hydraulic cycle times	
Lift arm raise	5.9 s (5.6 s)
Lift arm lower	3.3 s (3.3 s)
Bucket dump	1.6 s (1.5 s)
Total	10.8 s (10.4 s)
() : Data at Power Mode	

SERVICE REFILL CAPACITIES

Fuel tank	255 L
Engine coolant	30 L
Engine oil	25 L
Torque convertor & transmission	40 L
Front axle differential & wheel hubs	32 L
Rear axle differential & wheel hubs	32 L
Hydraulic oil tank	114 L
DEF/AdBlue® tank	25 L
